

The Site

The same Site Plan is shown here throughout, in plan view, and below in 3D view. Each of the plan sheets has category information overlaid to build up a picture of the natural infrastructure of the site & its characteristics, and constraints

Features and elements
Topography, including the significant features such as headlands, steep erosion prone slopes, ridges and gulleys
Soils
Hydrological systems (wetlands, springs, streams and rivers),
Vegetation – both indigenous and exotic
Ecological features
Archaeological and cultural sites
Existing development & access

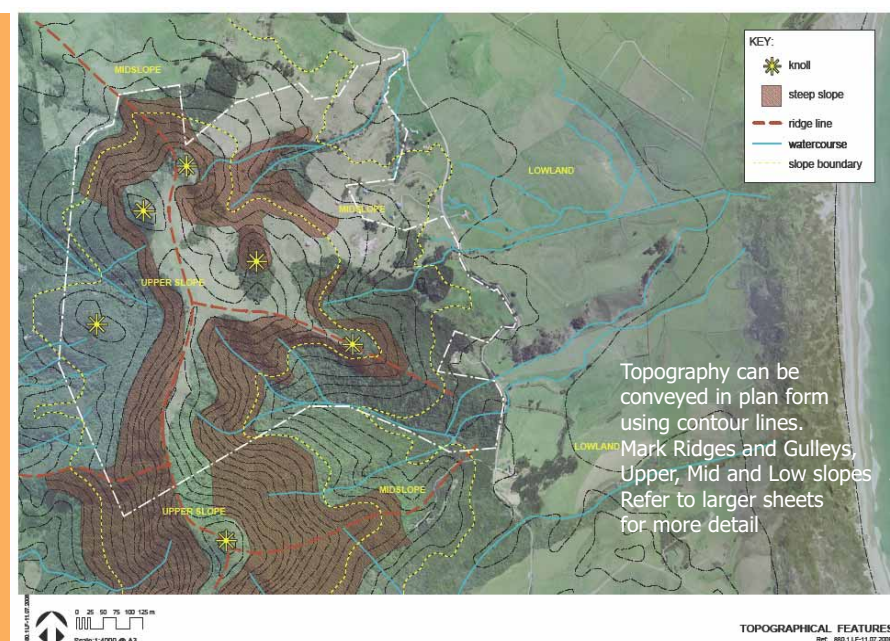

Vegetation Patterns **B**

Refer to **D** over (Enlarged plans)

For details of the plans shown here in thumbnail version, please refer to the individual topic sheets in chapter 2, this chapter

Landform Patterns **A**

Topography can be conveyed in plan form using contour lines. Mark Ridges and Gulleys, Upper, Mid and Low slopes. Refer to larger sheets for more detail

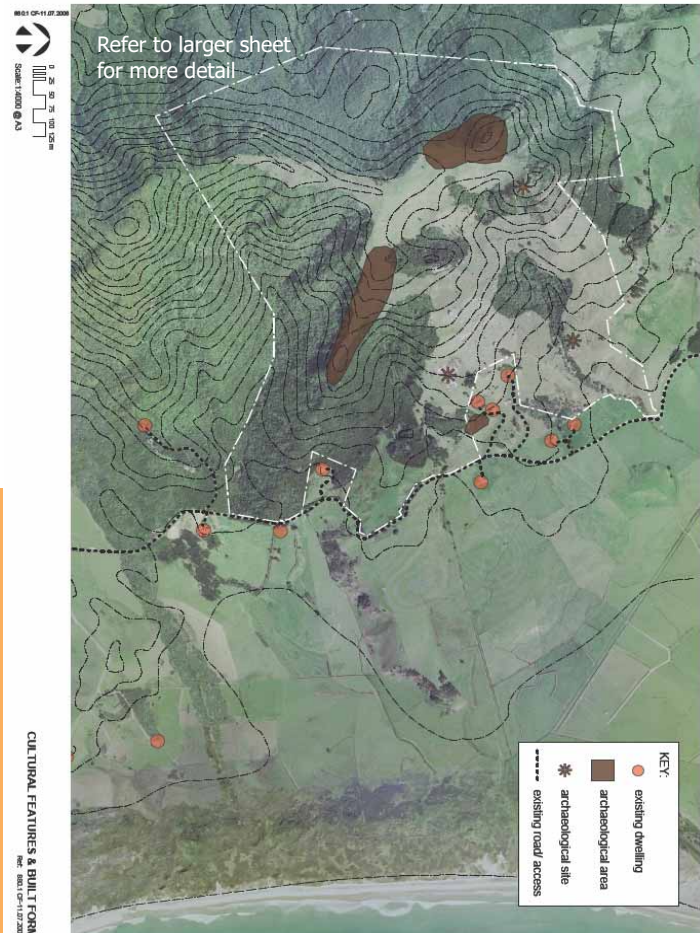

The site in plan view

Waterways & Wetlands **C**

Cultural Features **E**
