NPT.1.10	Public Trees

NPT.1.1 Description and Expectations

Trees provide a significant contribution to the amenity, historical, ecological and cultural values of the District. This is particularly so in urban areas where the ongoing demand for land development can threaten the existence of established trees.

Trees, whether individually or collectively, can have a number of positive effects on the environment. These include:

- A heritage and natural environmental legacy for current and future generations.
- Providing a habitat and food source for birds, insects and other wildlife.
- Providing shelter from the elements by providing shade, reducing glare and reducing the heat island effect.
- Improving the quality of waterways by filtering polluting particulates.
- Avoidance or mitigation of the effects of natural hazards, such as landslips and erosion by intercepting and reducing runoff and soil erosion.
- Absorbing carbon dioxide, releasing oxygen, and capturing and removing particulate matter and dust from the air.
- Providing a sense of place that contributes to character and local identity.
- Calming traffic, slowing speeds and providing a buffer between pedestrians and cars.
- Contributing to public health and well-being.

Individual trees and groups of trees that are considered to be among the most significant trees in Whangarei are scheduled in this chapter in order to protect the benefits they provide for current and future generations. These trees have been specifically identified as “Notable Trees” using the Standard Tree Evaluation Method (STEM™)¹. This takes into account a number of factors, with each factor scored in accordance with the STEM™ methodology and an overall score provided determining the status of the tree or trees as Notable Trees. Notable Trees are identified on the planning maps. The majority of scheduled Notable Trees are located on private land. A number of Notable Trees are also located in road reserves, parks and reserves.

Trees over a certain size in road reserves, parks and reserves are referred to throughout this chapter as “public trees”. Public trees make the streetscape more appealing while improving pedestrian amenity and public health. These trees also provide an important environmental function in terms of storing carbon, providing habitat and food for wildlife, improving air quality and providing ecological and amenity values. However, road reserves, parks and reserves facilitate a wide range of uses which can conflict

¹ Flook, R. 1996: A Standard Tree Evaluation Method, published by Ron Flook, Lower Hutt, New Zealand.

NPT.1

Notable and Public Trees

with the presence of trees. For instance, road reserves contain critical underground and network utility infrastructure and sometimes, conflict can occur between trees and these assets. As such the protection of public trees in road reserves, parks and reserves need to be balanced with these competing uses.

Future subdivision and development needs to consider how to accommodate existing and new trees and vegetation that contribute to ecological, cultural and amenity values, especially in new road reserves, parks and reserves. Council encourages the use of indigenous trees and vegetation in road reserves, parks and reserves and private land.

NPT.1.2 Eligibility

1. The following provisions shall apply district wide in addition to any other provisions in the District Plan applicable to the same area or site.
2. Any land use activity not requiring resource consent as a discretionary activity pursuant to NPT.1.5 is a permitted activity.
3. Any subdivision not requiring resource consent as a discretionary activity pursuant to NPT.1.6 is a controlled activity.
4. Where a tree or group of trees has been identified as a Notable Tree in NPT.1.9.1 and is located in a road reserve, park or reserve, the rules relating to Notable Trees shall take precedence.

NPT.1.3 Objectives

1. Notable trees and notable groups of trees with significant amenity, historical, ecological or cultural values are retained and protected from inappropriate subdivision, use and development.
2. Trees in road reserves, parks and reserves are protected and maintained where they positively contribute to amenity, historical, ecological or cultural values, while enabling the safe and efficient development, maintenance, operation and upgrading of the roading network and network utilities.
3. Future subdivision, use and development provides for trees that contribute to amenity, historical, ecological or cultural values.

NPT.1.4 Policies

1. To require that notable trees and notable groups of trees are retained and protected from inappropriate subdivision, use and development by:
 - a. Identifying and scheduling notable trees and notable groups of trees by applying the STEM™ criteria in NPT.1.8.
 - b. Ensuring that subdivision, use or development does not result in the removal of notable trees or notable groups of trees, or have adverse effects on the life of the tree or identified significant amenity, historical, ecological or cultural values.
 - c. Enabling trimming and alteration of notable trees and notable groups of trees in accordance with arboricultural best practice where works are required to safeguard life or property or where the works are necessary to accommodate the efficient operation of the roading network or network utilities.
 - d. Providing education and advice to encourage the protection of notable trees and notable groups of trees.
 - e. Requiring future subdivision, use or development to respond to, accommodate and protect notable trees and notable groups of trees.

NPT.1

Notable and Public Trees

2. To require the protection of trees in road reserves, parks and reserves while providing for the safe and efficient development, operation, use, maintenance and upgrading of infrastructure, utilities and the road network by:
 - a. Providing protection to trees over a certain size in road reserves, parks and reserves.
 - b. Enabling the ongoing maintenance of trees in road reserves, parks and reserves, while ensuring that tree selection and location recognises existing uses and adjoining landowners.
 - c. Encouraging the use of indigenous trees and vegetation, where appropriate, for planting within road reserves, parks and reserves, to recognise amenity, cultural and ecological values.
3. To recognise and provide for existing and new trees when designing future subdivision and development by:
 - a. Identifying existing trees on sites or in new road reserves, parks and reserves which meet the NPT.1.8 criteria and requiring the design of subdivision and development to respond to, and where appropriate schedule, these identified trees.
 - b. Assessing the need for new trees to contribute to the amenity, historical, ecological or cultural values of the neighbourhood.
 - c. Encouraging the use of indigenous trees and vegetation for planting, where appropriate, to recognise amenity, cultural and ecological values.

NPT.1.5 Discretionary Activities (Land Use)

Notable Trees

1. Trimming or alteration of Notable Trees listed in NPT.1.9.1 which does not comply with the following:
 - a. The trimming or alteration is required for the removal of dead, dying or diseased wood undertaken by a qualified arborist.
 - b. Tree works undertaken by a qualified arborist in accordance with arboricultural best practice where:
 - i. The maximum branch diameter must not exceed 100mm at severance;
 - ii. No more than 10% of the crown of the tree is removed in any 12 month period and;
 - iii. Any works must retain the natural shape, form and branch habit of the tree.
 - c. Emergency tree works undertaken by the Whangarei District Council or their authorised representative in order to safeguard life or property, or to restore power or telecommunications infrastructure.
 - d. Tree works undertaken by a qualified arborist on behalf of a network utility operator where branches are interfering with overhead wires or network utilities and the trimming is required in order to maintain the security of an existing supply or to restore power or telecommunication infrastructure.
 - e. Council are notified in writing at least five working days prior to the tree works being undertaken.
2. Construction or alteration of any structure, excavation of land, compaction of soil or formation of any new impervious surfaces within the dripline of a Notable Tree listed NPT.1.9.1.

NPT.1

Notable and Public Trees

3. Damage to or removal of a Notable Tree listed in NPT.1.9.1.

Public Trees

4. Trimming or alteration of any public tree identified in NPT.1.10.1 which does not comply with following:
 - a. The trimming or alteration is required for the removal of dead, dying or diseased wood undertaken by a qualified arborist.
 - b. Tree works are undertaken by a qualified arborist in accordance with arboricultural best practice where.
 - i. The maximum branch diameter does not exceed 100mm at severance;
 - ii. No more than one third of the foliage of the tree is removed in any 12 month period and;
 - iii. Works must retain the natural shape, form and branch habit of the tree.
 - c. Emergency tree works undertaken by the Whangarei District Council or their authorised representative.
 - d. Tree works undertaken by a qualified arborist on behalf of a network utility operator, where branches are interfering with overhead wires or network utilities and the trimming is required in order to maintain the security of an existing supply or to restore power or telecommunication infrastructure.
 - e. Tree works undertaken by Whangarei District Council, a road controlling authority or their designated agent required to maintain the visibility of road safety signage, maintain vehicle sight lines for traffic safety or to maintain legal clearance height and width above the road carriageway.
5. Construction or alteration of any structure, excavation of land, compaction of soil or formation of any new impervious surfaces within the dripline of any public tree identified in NPT.1.10.1 except where:
 - a. The works are thrusting to a depth of greater than 650mm for the installation of network utilities supervised by a qualified arborist.
6. Damage to or removal of any public tree pursuant to NPT.1.10.1.

NPT.1.6 Discretionary Activities (Subdivision)

1. Subdivision of land that contains a Notable Tree listed in NPT.1.9.1 which is not able to locate a 100m² building platform, accessway(s) and associated services outside of the dripline of the identified tree or group of trees.
2. Subdivision of land that contains a public tree identified in NPT.1.10.1, which is not able to locate a 100m² building platform, accessway(s) and associated services outside of the dripline of the identified tree or group of trees.
3. Subdivision of land that results in the root zone or dripline of a Notable tree listed in NPT.1.9.1 being located on more than one site.

NPT.1.7 Assessment Criteria for Discretionary Activities

1. When assessing discretionary applications pursuant to NPT.1.5 and NPT.1.6, the assessment shall include (but is not limited to):
 - a. The extent to which alternative methods to avoid the trimming, alteration or removal of the tree or trees have been considered.

NPT.1

Notable and Public Trees

- b. Consideration of the specific historical, ecological, cultural or amenity values of the tree or trees and whether effects on these values can be minimised or avoided.
- c. The degree to which any proposed mitigation adequately compensates for the values that the tree or trees provide.
- d. Whether any impact on the immediate or long term-health and stability of the tree or trees is able to be minimised or avoided.
- e. The actual and potential risk of actual damage to people and property from the tree or trees.
- f. Methods to contain and control plant pathogens and diseases including measures for preventing the spread of soil and the safe disposal of plant material.
- g. The provision of a tree works plan to address the effects of the works on the tree or trees and outlining the proposed methods to be used.
- h. The functional and operational needs of infrastructure.
- i. Consistency with best arboricultural practices including consideration of the need for the direction and supervision by an on-site monitoring arborist while the works are being carried out.
- j. When subdividing land containing a Notable Tree or protected public tree, the ability for reasonably anticipated future development to occur in a manner which does not adversely affect the health and retention of the tree or group of trees.

NPT.1.8 Criteria for Notable Tree Classification

1. To provide a basis for regulatory measures to protect trees of significant amenity, historical, ecological or cultural values, selection and listing of Notable Trees in table NPT.1.9.1, have been assessed against the Standard Tree Evaluation Method (STEM™)². A total score is calculated for each tree in accordance with the STEM™ criteria with trees scoring 100 points or greater being listed as Notable Trees in table NPT.1.9.1.
2. Consideration of any additional tree or group of trees for classification as Notable Trees shall also be assessed against the STEM™ criteria. Any tree which scores 100 points or greater can be considered for listing as a Notable Tree in table NPT.1.9.1.

NPT.1.9 Schedule of Notable Trees

1. This section contains details of Notable Trees identified on the Planning Maps. Trees within Table NPT.1.9.1 below have been identified in accordance with the criteria in NPT.1.8. Rules relating to these trees are provided in NPT.1.5 and NPT.1.6.

NPT.1.10 Protected Public Trees

1. Public tree means, any tree or trees located within a road reserve, park or reserve administered by Whangarei District Council greater than 6.0m in height or with a girth (measured 1.4m above the ground) greater than 600mm except:
 - a. Pest species identified in the Northland Regional Council Pest Management Strategy and Surveillance list are not subject to general protection.
 - b. Any tree listed as an Environmental weed or National pest plant under an approved document prepared in accordance with the Biosecurity Act 1993.
 - c. Any tree subject to an order made under Section 129 of the Property Law Act 1952.

NPT.1

Notable and Public Trees

- d. Any tree species grown for its edible fruit (except Walnut (*Juglans* spp.), Chestnut (*Castanea sativa*), Pecan nut (*Carya illinoensis*) and Carob (*Ceratonia siliqua*) which are protected).
- e. The following additional tree species are not subject to protection within a road reserve, park or reserve administered by Whangarei District Council:
 - i. *Acacia* species – all except *Acacia melanoxylon*.
 - ii. *Eucalyptus cinera* (silver dollar gum).
 - iii. *Acmena smithii* (acmena or lillypilly).
 - iv. *Casuarina* spp.
 - v. *Phoenix canariensis* (Phoenix palm).
 - vi. *Ligustrum* spp (Privet).
 - vii. *Salix* species (willow).
 - viii. *Hakea salicifolia*.
 - ix. *Archontophoenix cunninghamiana* (Bangalow palm).
 - x. *Erythrina x sykesii* (Coral Tree – also referred to as Flame Tree).
 - xi. *Trachycarpus Fortunei* (Windmill palm).
 - xii. *Populus yunnanensis* (Chinese Poplar).
 - xiii. *Cupressus macrocarpa* (Macrocarpa).
 - xiv. *Pinus* spp.
 - xv. *Prunus campanulata* (Taiwan cherry)
