I oppose these submissions as per my original submission:

While I support the excellent WDC/FNDC Collaborative GMO Plan Change, I want any EPA approved outdoor GE experiments or field trials prohibited as well as all GMO releases prohibited.

My reasons are: GE will contaminate the environment. I would like to be able to continue to grow and buy Non GE contaminated vegetables, food and honey in the future. Keep the environment pure!! No GE!!

I want the Councils to retain the proposed Plan Change, but I want them to make it stronger, with GE outdoor experiments and field trials banned due to many inadequately contained GE experiments in the past.

I wish to be heard at the Whangarei sitting of the hearing

I cannot gain an advantage in trade competition through this submission.

Sincerely

Arpad Toth

I oppose these submissions as per my original submission:

Once any outdoor trial is allowed it cannot be contained. Thus nearby properties will be contaminated. People in New Zealand value the unadulterated produce available now and in the future. G.E.contamination would also jeopardize our food exports.

I want the WDC to keep their proposed Plan Change and even make it muc stronger to banany uncontained (I.e.outdoor) GE experiments. Overseas expriments have show problems of contamination of neighbouring properties. It has even shown health risks to humans,such as allergies,sterility, low sperm count etc.

I wish to be heard at the Whangarei sitting of the hearing

I cannot gain an advantage in trade competition through this submission.

Susan Toth
