## Introduction

The fast track application process is designed for a domestic water meter to be installed on an existing connection point to a single lot of a completed subdivision.

Council will arrange a licensed contractor to fit the meter assembly and on-charge the costs in accordance with Council's schedule of fees and charges.

Please note if the water meter connection point is not visible, extra investigation work to locate the water connection will be charged to the applicant / owner.

## Application Procedure

Complete and submit this application form along with supporting documentation to a WDC Customer Services Representative at:

Forum North  
5 Rust Avenue  
Whangarei  
Or:

Ruakaka Service Centre  
Takutau Place  
Ruakaka

Customer Service Representatives can assist you with the application process.

Alternatively you can email any queries or your application to: [mailroom@wdc.govt.nz](mailto:mailroom@wdc.govt.nz)

Ensure all fields are completed in full, as incomplete applications may be rejected. The application must include a clearly detailed plan of intended works.

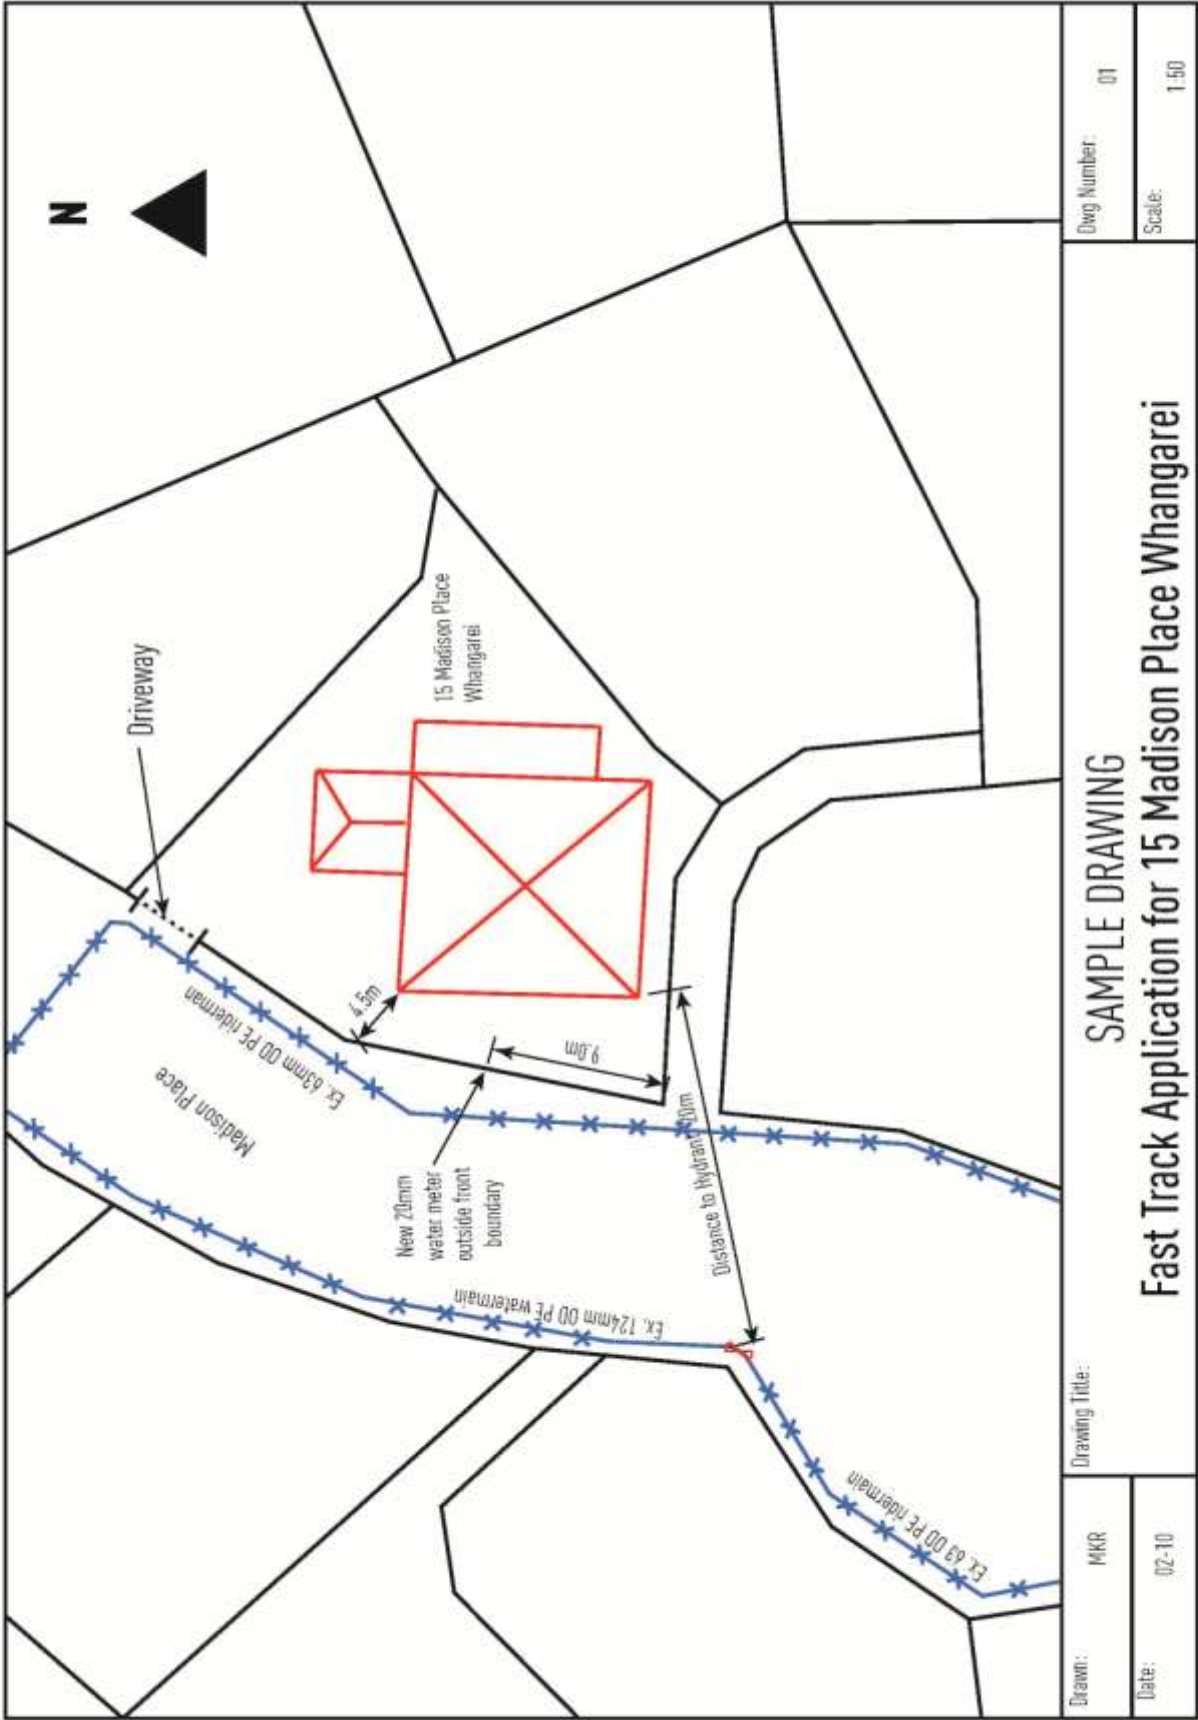

It is the applicant's responsibility to ensure that all drawings and supporting information is submitted in an acceptable format which also speeds up the processing of your application.

Upon approval the licensed contractor will carry out work in accordance with the approved plan, Council's specific requirements and current WDC Environmental Engineering Standards.

## Application Requirements

- The applicant must obtain a copy of the relevant network as-built plan relating to the property, showing the connection point where the water meter is required (available from the customer services office at Council).
- The applicant must provide a site plan in accordance with the public utility checklist.
- It is the applicant's responsibility to ensure all drawings, information, etc is submitted as per the sample drawing shown, to enable speed in processing.
- Backflow prevention (BFP) devices are required on domestic properties with swimming pools, stock troughs any other types of private water storage. They are also required on all commercial connections.

BFP's are installed directly after the meter and tested annually. WDC does not normally install BFP's. If a BFP is required please complete a free of charge 'standard' public utility application and engage a licensed contractor to install both meter and BFP.
