

INNOVATIVE SANITATION SOLUTIONS FOR PUBLIC AMENITIES

Lightweight, fireproof, termite and corrosion resistant, long-life eco-friendly solutions for places not easily accessible.

No power, No water, No sewerage – No problem!

Today's public service engineers face significant challenges – do more with less, sooner, while being more ecologically sustainable, saving money and reducing risk all around. LooCube is stepping up to help address these challenges.

Shoalwater Bay, QLD

Composting Toilets – Reducing Our Sanitation Carbon Footprint

Composting toilets are one of the lowest carbon footprint forms of safe sanitation available.

Low Environmental Impact through Resilient Materials and Zero Discharge

Our solutions align with sustainability goals and the specific needs of sensitive landscapes.

Gatton, QLD

Toonumbar Dam, NSW

Code-Compliant, Modular, Durable Public Solutions

Accessible, ambulant, and standard cubicle solutions with vandal-resistant options, ensuring durability and longevity in any environment.

Save Install Time

LooCube prefabricated kits significantly reduce both installation and maintenance time on-site and deliver seamless deployment of essential amenities.

Puckapunyal, VIC

Nudgee, QLD

Comprehensive Solutions: Composting, Desiccating, Dry Vault, and Reticulated

Flexible and adaptable, LooCubes adapt to all conditions.

The LooCube Advantages

LOW CARBON FOOTPRINT

RAPID INSTALL

LOW MAINTENANCE

PREFABRICATED

COST COMPETITIVE

UV STABILISED

MODULAR

FURNITURE PACKAGES

TERMITE
& VERMIN PROOF

HIGH FIRE RESISTANCE

NON-CORROSIVE
& ROT RESISTANT

Solutions

Single AirCube at Oodnadatta Aerodrome

AirCube

Our lightweight solution designed for easy prefabrication, pre-assembly, and air portability. The choice for quick deployment in remote locations.

Available in single or twin cubicle configuration, these toilets are rated up to 40,000 visits/year.

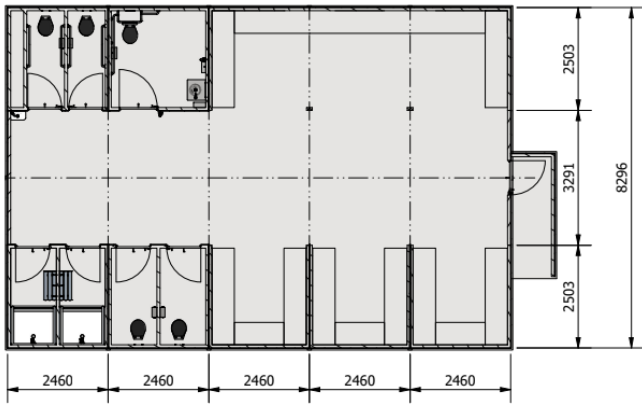

LooCube

Code-compliant, modular heavy and durable solutions with disabled and ambulant options. Pick your configuration and then add modules.

Available in twin, ambulant or accessible cubicle configuration, these toilets are rated up to 40,000 visits/year.

Nhulunbuy, NT

Change Rooms

Modular change rooms to suit your specific needs, now and as you grow. Change rooms can incorporate all LooCube modules, plus change room specific modules – open space, showers, nib walls and service corridors.

Ventilation Systems

LooCube ventilation systems provide passive, long-lasting ventilation systems using solar and venturi effects. These are supported by active ventilation using 12/240V fan solutions.

Potable Drinking and Handwashing Solutions

Powered by 12 volt solar systems, LooCube uses particulate, charcoal and UV filtration systems to provide safe clean drinking water. For simple solutions, gravity feed water from tanks is available. For ultra simple solutions, we provide a shelf for hand sanitizer.

Zero discharge Options

Many sites are special – for religious, cultural or ecological reasons, nothing can enter the local soil. Our Zero Discharge Unit offers a safe and assured means of managing leachate flows without them reaching the environment.

Toowoomba, QLD

Remote Sanitation Knowledge Base

LooCube has a comprehensive and growing sanitation design and knowledge base with new items being added daily.

LooCube Ramps and Tank Stands

Our range of ramp units are fully ANZ1428 compliant solutions and include standard 4.5m ramp units, 300 and 1200 mm spacers, 90 degree and 180 degree transitions. We can also engineer a ramp specific to your needs.

Tank stands are designed for building heights to suit our range of composting toilets. Engineered for capacities of 500 to 5000 litres, these are designed to maximise gravity flow to handwash basins.

Dirawong, NSW

Flexible Solutions for All Places

We have delivered solutions from Christmas Island to Whangarei, New Zealand to Bomana PNG and all across every state and territory.

We can assist with planning your next sanitation project and would love to offer any suggestions and recommendations for you to consider including:

- Standard, ambulant and UAT (Code compliant)
- Slab-on-ground or raised construction
- Reticulated, dry vault, composting and dessicating solutions
- Cladding options - internal and external
- Vandal resistance options
- Building System PSI and foundation design service
- Custom drafting facilities for unique situations
- Decorative laser cut fascias featuring your artwork
- Range of solar and lighting configurations
- Water supply options including potable water solutions
- Kitset, flat-pack, or complete installation with our installation partners
