

The Clivus Multrum™ concept was developed in Sweden in the 1930's, and was the first compost toilet in the world. The name 'Clivus Multrum' actually translated as 'inclining compost room', and here in Australia, we have been selling these environmentally friendly toilet systems to people all over the country for over 35 years! So it stands to reason that we know our products and we understand our customer needs.

Clivus Multrum™ provides environmentally smart and cost-effective, waterless composting toilets for domestic and commercial use across Australia. Our Australian Standard approved toilets are natural and easy to maintain. The composting process is reliable, convenient and safe and its results are environmentally friendly and ecologically sustainable.

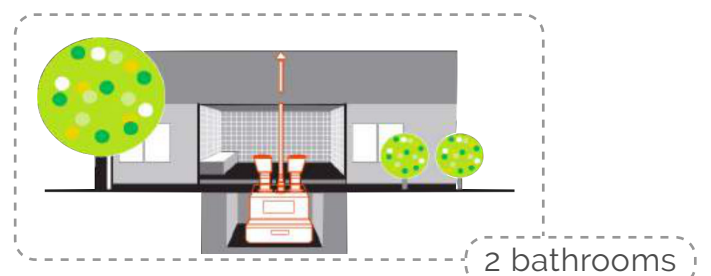

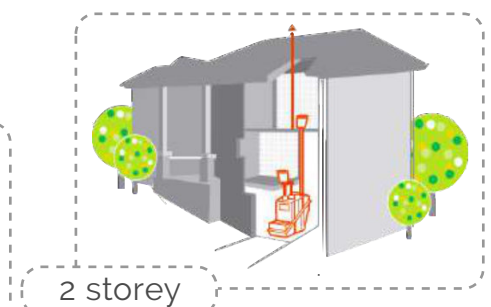

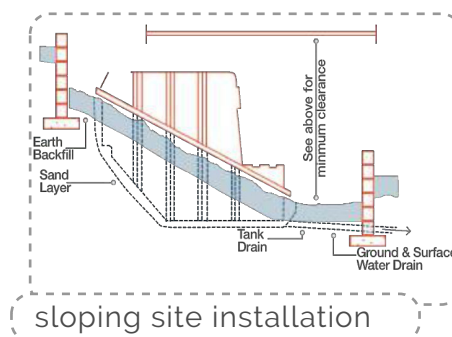

How It works:

The Clivus Multrum™ system is based on a "Continuous" composting process in one large chamber. As the organic material decomposes it will reduce in volume by up to 90%. The compost pile is therefore always 'shrinking in the middle' whilst new material is being added to the top, and finished compost is removed from the bottom of the pile as required.

Where can a clivus multrum™ be installed:

National Parks & Wildlife Services
Roadside Rest Areas
Mines
Defence Camps in Remote Areas
Tourist Lodges & Resorts
Camping Grounds
Permaculture Centres
Remote Communities
Alpine Regions
Environmental Education Centres
Scout Associations
Local Sporting Groups
Domestic Households
Holiday Homes/Weekenders

Specifications:

MODEL	USES	APPLICATIONS	DIMENSIONS mm	OTHER
CM8	Daily 20 visits (average) Annual 8000 visits (approx)	Domestic applications *Accommodates one toilet pedestal	Length = 1550 Width = 1232 Height = 1065	Min. clearance under floor = 1160 Min. clearance under floor if buried = 960 (Max. buried in ground at front = 200) Max. fixtures = 1 pedestal
CM10	Daily 25 visits (average) Annual 10000 visits (approx)	Domestic and small public facilities. *Accommodates two toilet pedestals	Length = 1550 Width = 1560 Height = 1100	Min. clearance under floor = 1160 Min. clearance under floor if buried = 960 (Max. buried in ground at front = 200) Max. fixtures = 2 pedestals
CM14	Daily 38 visits (average) Annual 14000 visits (approx)	Larger households and small public facilities where height under a house or building is limited *Accommodates two toilet pedestals	Length = 2080 Width = 1500 Height = 1090	Min. clearance under floor = 1190 Min. clearance under floor if buried = 710 (Max. buried in ground at front = 480) Max. fixtures = 2 pedestals
CM20	Daily 55 visits (average) Annual 20000 visits (approx)	Large houses with more than one toilet, small to medium sized public facilities. *Accommodates two toilet pedestals and one urinal	Length = 2390 Width = 1200 Height = 1630	Min. clearance under floor = 1680 Min. clearance under floor if buried = 1410 (Max. buried in ground at front = 270) Max. fixtures = 2 pedestals + 1 urinal
CM40	Daily 110 visits (average) Annual 40000 visits (approx)	Larger public and commercial facilities, e.g. roadside stops and national parks. *Accommodates four toilet pedestals and two urinals	Length = 2480 Width = 1890 Height = 1720	Min. clearance under floor = 1850 Min. clearance under floor if buried = 1600 (Max. buried in ground at front = 250) Max. fixtures = 4 pedestals + 2 urinals

what you get when you order a clivus multrum system

A standard Tank Package includes:

- * Fully assembled composting tank
- * Pedestal chute (0.7m) and collar
- * 12V fan & 240V transformer
- * Vent pipe flashing, fan housing & vent rain cover (150mm)
- * Maintenance tool
- * Starter bacteria
- * Bulking agent sample
- * Sealant & screws
- * Installation manual
- * Operation & Maintenance manual

A Standard Pedestal Package includes: (Various options available)

- * Toilet pedestal & seat
- * Sign & stickers
- * Hold down bolts/screws

(When you purchase more than one pedestal and seat, an additional pedestal chute and collar will also be required and sold separately.)
