

# Notable Trees (TREE)

## Issues

Trees provide a significant contribution to the amenity, historical and ecological values of the District. This is particularly so in [urban areas](#) where the ongoing demand for [land](#) development can threaten the existence of established trees.

Trees, whether individually or collectively, can have a number of positive [effects](#) on the [environment](#). These include:

- A heritage and natural environmental legacy for current and future generations.
- Providing a habitat and food source for birds, insects and other wildlife.
- Providing shelter from the elements by providing shade, reducing glare and reducing the heat island [effect](#).
- Improving the quality of waterways by filtering polluting particulates.
- Avoidance or mitigation of the [effects](#) of [natural hazards](#), such as landslips and erosion by intercepting and reducing runoff and soil erosion.
- Absorbing carbon dioxide, releasing oxygen, and capturing and removing particulate matter and dust from the air.
- Providing a [sense of place](#) that contributes to character and local identity.
- Calming traffic, slowing speeds and providing a buffer between pedestrians and cars.
- Contributing to public health and well-being.

Council and landowners have a role in management and responsibility for Notable Trees. Trees can have adverse [effects](#) on people and property, which can include limb failure or tree collapse, leaf drop, shading, increased [building](#) maintenance, root invasion, fire risk, and health and safety.

Individual trees and groups of trees that are considered to be among the most significant trees in Whangarei are scheduled in this chapter in order to protect the benefits they provide for current and future generations. These trees have been specifically identified as “Notable Trees” using the Standard Tree Evaluation Method (STEM™)<sup>1</sup>. This takes into account a number of factors, with each factor scored in accordance with the STEM™ methodology and an overall score provided determining the status of the tree or trees as Notable Trees. Notable Trees are identified on the planning maps. The majority of scheduled Notable Trees are located on private [land](#). A number of Notable Trees are also located in [road](#) reserves, parks and reserves.

Trees over a certain size in [road](#) reserves, parks and reserves are referred to throughout this chapter as “[public trees](#)”. [Public trees](#) make the streetscape more appealing while improving pedestrian amenity and public health. These trees also provide an important environmental function in terms of storing carbon, providing habitat and food for wildlife, improving air quality and providing ecological and [amenity values](#). However, [road](#) reserves, parks and reserves facilitate a wide range of uses which can conflict with the presence of trees. For instance, [road](#) reserves contain critical underground and network utility [infrastructure](#) and sometimes, conflict can occur between trees and these assets. As such the protection of [public trees](#) in [road](#) reserves, parks and reserves need to be balanced with these competing uses.

Future [subdivision](#) and development needs to consider how to accommodate existing and new trees and vegetation that contribute to ecological and [amenity values](#), especially in new [road](#) reserves, parks and reserves. This may require careful consideration of where trees are planted, in relation to existing and planned [infrastructure](#) and network utilities. Council encourages the use of indigenous trees and vegetation in [road](#) reserves, parks and reserves and private [land](#).

---

# Notable Trees (TREE)

*Notes:*

1. *The following provisions shall apply district wide in addition to any other provisions in the District Plan applicable to the same area or [site](#).*
2. *Where a tree or group of trees has been identified as a Notable Tree in TREE-SCHED1 – Schedule of Notable Trees and is located in a [road](#) reserve, park or reserve, the rules relating to Notable Trees shall take precedence.*

**Refer to TREE-SCHED1 below for the Schedule of Notable Trees.**

Objectives	
TREE-O1 – Notable Trees	Notable trees and notable groups of trees with significant amenity, historical or ecological values are maintained, retained and protected from inappropriate <a href="#">subdivision</a> , <a href="#">land</a> use and development.
TREE-O2 – Public Trees	<a href="#">Public trees</a> in <a href="#">road</a> reserves, parks and reserves are protected and maintained where they positively contribute to amenity, historical or ecological values, while enabling the safe and efficient use, development, maintenance, operation and upgrading of the roading network and network utilities.
TREE-O3 – Providing for Existing and New Trees	Future <a href="#">subdivision</a> , use and development appropriately provides for existing and new trees that contribute to amenity, historical or ecological values, ensuring that any design can accommodate such trees, whilst recognising the need to avoid future conflicts with roading and network utility <a href="#">infrastructure</a> .

Policies	
TREE-P1 – Notable Trees	<p>To require that notable trees and notable groups of trees are maintained, retained and protected from inappropriate <a href="#">subdivision</a>, <a href="#">land</a> use and development by:</p> <ol style="list-style-type: none"> <li>1. Identifying and scheduling notable trees and notable groups of trees by applying the STEM™ criteria in Criteria for Notable Tree Classification in TREE – Appendix 1.</li> <li>2. Ensuring that <a href="#">subdivision</a>, <a href="#">land</a> use or development does not result in the inappropriate removal of notable trees or notable groups of trees, or have adverse <a href="#">effects</a> on the life of the tree or identified significant amenity, historical or ecological.</li> <li>3. Enabling pruning and maintenance of notable trees and notable groups of trees in accordance with arboricultural best practice where works are necessary to:               <ol style="list-style-type: none"> <li>a. Safeguard life or property; or</li> <li>b. Manage adverse <a href="#">effects</a> on people and property; or</li> <li>c. Provide for the safe and efficient use and operation of the roading network or network utilities; or</li> <li>d. Ensure the ongoing health, wellbeing and longevity of the tree or group of trees.</li> </ol> </li> </ol>

# Notable Trees (TREE)

	<ol style="list-style-type: none"> <li>4. Providing education and advice to encourage the protection of notable trees and notable groups of trees.</li> <li>5. Requiring future <u>subdivision</u>, <u>land</u> use or development to respond to, accommodate and protect notable trees and notable groups of trees.</li> <li>6. Recognising that the removal of an identified notable tree or notable groups of trees may be appropriate if:             <ol style="list-style-type: none"> <li>a. It is demonstrated that there is a risk to human health and/or property, or the safe and efficient operation of the roading network or network utility <u>infrastructure</u>, based on a risk assessment.</li> <li>b. It is demonstrated that there is no practicable alternative to the removal.</li> <li>c. Where necessary, an assessment is provided of suitable mitigation or offset for the removal.</li> </ol> </li> <li>7. Managing identified notable trees to avoid, or where avoidance is not possible, contain or control, the spread of plant pathogens.</li> </ol>
<p>TREE-P2 – Public Trees</p>	<p>To require the protection of <u>public trees</u> in <u>road</u> reserves, parks and reserves while providing for the safe and efficient development, operation, use, maintenance and upgrading of <u>infrastructure</u>, network utilities and the <u>road</u> network by:</p> <ol style="list-style-type: none"> <li>1. Providing protection to <u>public trees</u> over a certain size in <u>road</u> reserves, parks and reserves.</li> <li>2. Enabling the ongoing maintenance of <u>public trees</u> in <u>road</u> reserves, parks and reserves, while ensuring that tree selection and location recognises existing uses and adjoining landowners.</li> <li>3. Encouraging the use of indigenous trees and vegetation, where appropriate, for planting within <u>road</u> reserves, parks and reserves, to recognise amenity and ecological values.</li> <li>4. Enabling appropriate works to <u>public trees</u> to provide for the safe and efficient operation, use, maintenance and upgrading of network utilities.</li> <li>5. Recognising that the removal of any protected <u>public trees</u> may be appropriate if:             <ol style="list-style-type: none"> <li>a. It is demonstrated that the tree or trees would not meet the threshold for protection pursuant to the STEM™ Criteria for Notable Tree Classification in TREE – Appendix 1.</li> <li>b. It is demonstrated that there is a risk to human health and/or property, or the safe and efficient operation of the roading network or network utility <u>infrastructure</u>, based on a risk assessment.</li> <li>c. It is demonstrated that there is no practicable alternative to the removal.</li> <li>d. Where necessary, an assessment is provided of suitable mitigation or offset for the removal.</li> </ol> </li> </ol>

# Notable Trees (TREE)

	6. Managing protected <u>public trees</u> to avoid, or where avoidance is not possible, contain or control, the spread of plant pathogens.
TREE-P3 – Recognising and Providing for Existing and New Trees	<p>To recognise and provide for existing and new trees when designing future <u>subdivision</u> and development by:</p> <ol style="list-style-type: none"> <li>1. Identifying existing trees on <u>sites</u> or in new <u>road</u> reserves, parks and reserves which meet the Criteria for Notable Tree Classification in TREE – Appendix 1 and requiring the design of <u>subdivision</u> and development to respond to, and where appropriate schedule, these identified trees.</li> <li>2. Assessing the need for new trees to contribute to the amenity, historical or ecological values of the neighbourhood.</li> <li>3. Encouraging the use of indigenous trees and vegetation for planting, where appropriate, to recognise amenity, cultural and ecological values.</li> <li>4. Recognising the need to avoid future conflicts with roading, network utility <u>infrastructure</u> and the health and safety of people and property.</li> </ol>

## Rules

TREE-R1	Pruning or Maintenance of any Notable Tree	
	<p>Activity Status: Permitted</p> <p>Where:</p> <ol style="list-style-type: none"> <li>1. The pruning or maintenance of any Notable Tree listed in TREE-SCHED1 which is:               <ol style="list-style-type: none"> <li>a. Required for the removal of broken, dead, dying or diseased wood; or</li> <li>b. Undertaken in accordance with arboricultural best practice where:                   <ol style="list-style-type: none"> <li>i. The maximum branch diameter does not exceed 200mm at severance;</li> <li>ii. No more than 20% of live growth of the tree is removed in any 12 month period, excluding pruning or maintenance undertaken in accordance with TREE-R1.1(d); and</li> </ol> </li> </ol> </li> </ol>	<p>Activity Status when compliance with TREE-R1.1 not achieved: Controlled</p> <p>Where:</p> <ol style="list-style-type: none"> <li>1. The pruning or maintenance of any Notable Tree listed in TREE-SCHED1 which is undertaken by a qualified arborist:               <ol style="list-style-type: none"> <li>a. Is for the purposes of ensuring the safety of people or avoiding damage to property; and</li> <li>b. Is no more than one third of the live growth of the tree is removed in any 12 month period, excluding pruning or maintenance undertaken in accordance with TREE-R1.1(d); and</li> <li>c. Is undertaken in a manner than ensures the ongoing health, wellbeing and longevity of the tree.</li> </ol> </li> </ol> <p>Matters of Control:</p> <ol style="list-style-type: none"> <li>1. The nature and extent of pruning or maintenance required to ensure the safety of people and/or avoid damage to property; and</li> <li>2. Measures to ensure:               <ol style="list-style-type: none"> <li>a. The ongoing health, wellbeing and longevity of the tree; and</li> </ol> </li> </ol>

# Notable Trees (TREE)

	<ul style="list-style-type: none"> <li>iii. The ongoing health, wellbeing and longevity of the tree is maintained; or</li> <li>c. Based on a risk assessment from a qualified arborist, is required as <b>emergency tree works</b>; or</li> <li>d. Undertaken by a qualified arborist on behalf of a <b>network utility operator</b> or landowner where branches are interfering, or are likely to interfere within the next 12 months, with overhead wires or network utilities and the pruning or maintenance is required in order to maintain the security of an existing supply, to restore power or <b>telecommunication infrastructure</b> or to comply with the Electricity (Hazards from Trees) Regulations 2003; and</li> <li>e. Notified in writing to Whangarei District Council at least five working days prior to the tree works being undertaken, with the exception of tree works in clause c. and d. above.</li> </ul>	<ul style="list-style-type: none"> <li>b. The ongoing maintenance of the tree.</li> </ul> <p><i>Notes:</i></p> <ol style="list-style-type: none"> <li>1. <i>TREE-REQ1 shall apply.</i></li> <li>2. <i>Applications shall not require written consent of affected persons and shall not be notified or limited notified.</i></li> </ol> <p>Activity Status when compliance is not achieved with TREE-R1.1 and the activity is not a Controlled activity: Restricted Discretionary</p> <p>Matters of discretion:</p> <ol style="list-style-type: none"> <li>1. Alternative methods to avoid the pruning of the tree or trees.</li> <li>2. The specific historical, ecological or <b>amenity values</b> of the tree or trees.</li> <li>3. Mitigation, offset or compensation for the environmental values that the tree or trees provide.</li> <li>4. The ongoing health, wellbeing and longevity of the tree or trees.</li> <li>5. The actual and potential risk of damage to people and property from the tree or trees.</li> <li>6. Methods to contain and control plant pathogens and diseases including measures for preventing the spread of soil and the safe disposal of plant material.</li> <li>7. The functional need and operational need of <b>infrastructure</b> and network utilities.</li> <li>8. <b>TREE-R7</b>	<b>Subdivision where the Land Contains a Notable Tree or a Public Tree</b>	
	<p>Activity Status: Controlled</p> <p>Where:</p> <ol style="list-style-type: none"> <li>1. The <u>land</u> contains a Notable Tree listed in TREE-SCHED1 or a <u>public tree</u> which is able to locate a <u>building</u> platform of at least 100m<sup>2</sup>, accessway(s) and associated services outside of the <u>root zone</u> of the identified tree or group of trees.</li> <li>2. The <u>subdivision</u> does not result in the <u>root zone</u> of a Notable Tree listed in TREE-SCHED1 being located on more than one <u>site</u>.</li> </ol>	<p>Activity Status when compliance not achieved: Discretionary</p> <p><i>Note:</i></p> <ol style="list-style-type: none"> <li>1. <i>TREE-R1 shall apply.</i></li> </ol>

<b>TREE-REQ1</b>	<b>Information Requirement – Discretionary Activities</b>
	<ol style="list-style-type: none"> <li>1. Applications must include a plan and/or description of the proposed pruning or maintenance prepared by a qualified arborist</li> </ol>

<b>TREE-REQ2</b>	<b>Information Requirement - Land Use and Subdivision</b>
	<ol style="list-style-type: none"> <li>1. When assessing discretionary applications the assessment shall include (but is not limited to):             <ol style="list-style-type: none"> <li>a. The extent to which alternative methods to avoid the pruning or removal of the tree or trees have been considered.</li> <li>b. Consideration of the specific historical, ecological or <u>amenity values</u> of the tree or trees and whether <u>effects</u> on these values can be minimised or avoided.</li> <li>c. The degree to which any proposed mitigation adequately compensates for the values that the tree or trees provide.</li> <li>d. Whether any impact on the immediate or long term-health and stability of the tree or trees is able to be minimised or avoided.</li> </ol> </li> </ol>

## Notable Trees (TREE)

- e. The actual and potential risk of actual damage to people and property from the tree or trees.
- f. Methods to contain and control plant pathogens and diseases including measures for preventing the spread of soil and the safe disposal of plant material.
- g. The provision of a tree works plan to address the effects of the works on the tree or trees and outlining the proposed methods to be used.
- h. The functional need and operational need of infrastructure and network utilities.
- i. Consistency with best arboricultural practices including consideration of the need for the direction and supervision by an on-site monitoring arborist while the works are being carried out
- j. When subdividing land containing a Notable Tree or protected public tree, the ability for reasonably anticipated future development to occur in a manner which does not adversely affect the health and retention of the tree or group of trees.

# TREE – Appendix 1

## Notable Tree Classification

To provide a basis for regulatory measures to protect trees of significant amenity, historical or ecological values, selection and listing of Notable Trees in *TREE-SCHED1 – Schedule of Notable Trees* below, have been assessed against the Standard Tree Evaluation Method (STEM™)<sup>2</sup>. A total score is calculated for each tree in accordance with the STEM™ criteria with trees scoring 100 points or greater being listed as Notable Trees.

Consideration of any additional tree or group of trees for classification as Notable Trees shall also be assessed against the STEM™ criteria. Any tree which scores 100 points or greater can be considered for listing as a Notable Tree in Table TREE 1 of this Appendix.

## TREE-SCHED1 – Schedule of Notable Trees

This schedule contains details of Notable Trees identified on the Planning Maps. Trees within the table below have been identified in accordance with the assessment criteria for Notable Tree Classification. The assessment criteria and rules relating to these trees are provided the Notable Trees (TREE) Chapter.

TREE-SCHED1 – Schedule of Notable Trees						
Site ID	Common Name	Botanical Name	Stem Score	Site Address	Legal Description	District Plan Map.
200	Taraire	Beilschmiedia tarairi	102	89 Crawford Crescent, Kamo	Lot 1 DP 65923	10, 58, 59
201	Taraire	Beilschmiedia tarairi	144	89A Crawford Crescent, Kamo	Lot 2 DP 65923	10, 58, 59
202	Taraire (2)	Beilschmiedia tarairi	150	47 Three Mile Bush Road, Kamo	Lot 78 DP 51732	10, 58, 59
203	Puriri	Vitex lucens	123	14 Barclay Place, Kamo	Lot 14 DP 62193	10, 58, 59
205	Puriri	Vitex lucens	126	34 Puriri Street, Kamo	Lot 1 DP 131477	10, 58
206	Illawarra Flame Tree	Brachychiton acerifolium	105	17 Puriri Street, Kamo	Part Lot 9 DEEDS W 72	10, 58, 59
