

Signs (SIGN)

Issues

Signs play an important role in communication and may be used to identify places, provide information about community facilities and services, convey important health and safety messages, and control and direct traffic. Signs also enable businesses to advertise goods and services which is important in supporting the social and economic wellbeing of the District.

The importance of the role of signs needs to be balanced against the impact that excessive, poorly designed or inappropriately located signs can have, particularly on the safety of the transport network and the [amenity values](#) of an area.

It is appropriate that some signs be allowed in order to support the communication of important information and enable the identification of facilities, directions and goods and services. However, controls on the design, number, size and location of signage are also required in order to ensure that the [amenity values](#) of the various zones within the District are maintained and so that signs do not compromise the safe and efficient operation of the transport network and/or the legibility of certain areas.

Illumination of signage is increasingly used within the Whangarei District and may be associated with businesses advertising or the conveyance of safety information (including traffic safety). Illuminated signage is generally considered an effective method of conveying information due to its predominance against a dark background. However careful consideration needs to be applied to the design and location of illuminated signage. This is because poorly designed and located illuminated signage can have a detrimental impact on the surrounding [environment](#) including amenity and the safe and efficient operation of the transport network. For clarity purposes, the definition of Illuminated Sign includes reflective signs, digital signs, and signs that incorporate flashing, animation and variable message displays.

The District Plan controls apply to permanent signage where it is located on private land, public spaces such as parks and reserves and other civic spaces, and within the road, including footpaths and verandahs of [buildings](#). Temporary signage which can be seen from public areas and the road, such as electoral signage, real estate signage and temporary event signage, is controlled through Council Bylaws. It is important to note that permanent signs located on or over roads, footpaths and public places are also subject to standard construction requirements for public safety purposes as specified in the Council Bylaw. Signs may also be subject to landowner approval and requirements imposed by the road controlling authority under the Land Transport Act 1998. All signs located on or over a state highway are subject to the NZ Transport Agency Signs on State Highways Bylaw 2010.

Objectives

SIGN-O1 – Provision for Signs

Signage is provided for across a range of zones where:

1. It maintains, or where appropriate enhances, the character and amenity of the surrounding zone.
2. It does not adversely impact heritage values, the transport network, pedestrian and cyclist safety, or impede the efficient use of infrastructure.
3. It is provided in a manner which is efficient, legible and functional.

SIGN-O2 – Illuminated Signs

Illuminated signage is provided for where it contributes to the social, cultural and economic wellbeing of the District in a manner which:

1. Maintains or enhances the amenity and character of the surrounding [environment](#).
