

Rural Production Zone (RPROZ)

Issues

The Rural Production Zone (RPROZ) encompasses a large area of the Whangarei District. The purpose of the Rural Production Zone is to sustainably manage the [natural and physical resources](#) of the [rural area](#) in order to:

- Protect, sustain and promote [rural production activities](#) as well as those activities that support rural communities.
- Protect areas of significant ecological and biodiversity values (such as indigenous bush and wetlands).
- Enable the rehabilitation of ecological and biodiversity values.
- Maintain rural amenity and character.

The zone comprises a varied array of topography, landforms, landscapes, soil types, biodiversity and catchments. It is important that the ecological and landscape values of the Rural Production Zone are recognised and where appropriate are protected and enhanced. Ecological and landscape values contribute significantly to the rural character and distinctiveness of the Whangarei District. Parts of the Rural Production Zone are located within the coastal [environment](#). The values of the coastal [environment](#) are managed by the District Plan's Coastal Environment provisions as well as the provisions in this section.

The interplay of historical [land](#) use and values has resulted in the environmental character that exists in the Rural Production Zone today. This character is made up of the varied natural landforms and natural features, openness, as well as an existing [subdivision](#) and development pattern. It is mostly characterised by a working/living [environment](#), with the noises, odours and visual [effects](#) associated with a wide range of [farming](#), horticultural, forestry and [mineral extraction](#) activities. There is an expectation that [rural production activities](#) will be able to continue to operate without onerous or restrictive intervention in the Rural Production Zone.

[Rural production activities](#) are important contributors to the Whangarei and Northland economy. The Rural Production Zone includes most of the productive rural [land](#) area of the District. It is important that these areas are not compromised for rural production. It is expected that a diverse range of [rural production activities](#) will continue to operate and new activities will establish in the Rural Production Zone. Changing demands for existing produce and new markets establishing mean that the provisions for the Rural Production Zone need to be flexible to accommodate current and future production needs.

The Rural Production Zone provides for [commercial activities](#) and [industrial activities](#) that have a functional need to service [rural production activities](#) and/or rural communities or provide location based recreation or tourist activity.

Conflicting [land](#) use and [reverse sensitivity effects](#) must be carefully managed where the Rural Production Zone interfaces with [sensitive activities](#) including habitable [buildings](#) in other [rural areas](#) and [Residential Zones](#), and with [Business Zones](#). Where the Rural Production Zone is traversed by existing major [infrastructure](#) services, [land](#) use conflicts must be managed. Quarrying [Resource Areas](#) apply over the Rural Production Zone and [Strategic Rural Industries](#) Zones are surrounded by the Rural Production Zone. Providing for [mineral extraction](#) activities and [strategic rural industries](#) to occur and avoidance of conflicting [land](#) use activities is important for their on-going operation.

A history of ad hoc rural living [subdivision](#) and development has resulted in a scattered and ad hoc pattern of development across the [rural area](#). Where the [rural area](#) abuts Whangarei City, Rural Production Zone will apply. Areas for future urban growth, [land](#) use and [subdivision](#) development is spatially managed by the Future Urban Zone to maintain options for the continued growth of the City.

Rural Production Zone (RPROZ)

Where rural living clusters have reached significant density and lifestyle character they have been identified as the Rural Lifestyle Zone to manage the actual and potential [reverse sensitivity effects](#) associated with rural living activities occurring in close proximity to [rural production activities](#).

The Rural Production Zone will not support an increased level of clustered rural living development. Consistent with a consolidated pattern of development residential, rural residential and rural living activities are directed to identified rural settlements, the Future Urban Zone or the Rural Lifestyle Zone to protect the productivity, biodiversity and rural character of the Rural Production Zone.

Urban and rural residential types of development can erode the viability of rural productivity and can create [reverse sensitivity](#) impacts on productive uses through the visual [effect](#) of large scale [buildings](#) and incidental [structures](#), increased traffic generation, and loss of amenity including privacy, rural outlook, spaciousness, and quietness, particularly when a new incompatible activity is located near an existing activity, with resulting conflicts.

Objectives	
RPROZ-O1 – Rural Land Resources	Identify and protect productive rural land resources for a diverse range of rural production activities .
RPROZ-O2 – Land Use Activities	Enable a wide range of rural production activities and provide for commercial activities and industrial activities that support rural production activities and/or rural communities including recreation and tourist based activities to establish and operate in the Rural Production Zone to contribute to the District's economy.
RPROZ-O3 – Rural Character and Amenity	Recognise, maintain and where appropriate protect the rural character and amenity of the Rural Production Zone.
RPROZ-O4 – Adverse Effects	Avoid adverse effects on productive land resources from residential, rural residential and rural living subdivision and development in the Rural Production Zone.
RPROZ-O5 – Fragmentation	Minimise the fragmentation of rural land and promote allotment sizes that facilitate rural production activities other than to protect significant ecological and biodiversity values.
RPROZ-O6 – Coastal Environment	Provide for rural production activities that are compatible with the Coastal Environment.
RPROZ-O7 – Protection and Enhancement	Encourage protection and enhancement of significant ecology, biodiversity, landscapes and historic heritage .

Policies	
RPROZ-P1 – Rural Character and Amenity	<p>To protect the distinctive rural character and amenity of the Rural Production Zone including but not limited to:</p> <ol style="list-style-type: none"> 1. A dominance of natural features including landforms, watercourses and vegetation. <ol style="list-style-type: none"> a. A predominately working rural production environment, including:

Rural Production Zone (RPROZ)

	<ul style="list-style-type: none"> i. The presence of large numbers of farmed animals and extensive areas of plant, vine or fruit crops and areas of forestry. ii. <u>Ancillary activities</u> and <u>structures</u> (including <u>crop support structures</u> and <u>artificial crop protection structures</u>) across the landscape. b. Seasonal activities. c. A low intensity of development, involving a combination of domestic and rural production <u>buildings</u> and <u>major structures</u>. d. Varying levels of noise associated with seasonal and intermittent <u>rural production activities</u>. e. Relatively open space and low density of development. f. Odours, noise and dust typical of rural activities. g. Generally low levels of vehicle traffic with seasonal fluctuations.
RPROZ-P2 – Land Use Activities	<p>To protect rural productive <u>land</u>, rural character and amenity and to encourage consolidation of activities within Whangarei City by:</p> <ol style="list-style-type: none"> 1. Only providing for <u>commercial activities</u> and <u>industrial activities</u> in the Rural Production Zone where it is demonstrated that the activity: <ul style="list-style-type: none"> a. Has a direct connection with the rural resource and supports <u>rural production activities</u> and/or rural communities, including recreation and tourist based activities. b. Requires a rural location for its operational function. c. Will minimise the potential for <u>reverse sensitivity effects</u> between incompatible <u>land</u> use activities. d. Will contain and manage adverse <u>effects</u> on-site. e. Will contribute positively to the economy of the District. f. Can meet and fund local <u>infrastructure</u> requirements. 2. Not directly regulating outdoor agricultural and horticultural activities, excluding <u>intensive livestock farming</u>. 3. Permitting <u>farming</u> and <u>activities ancillary to farming or forestry</u>. 4. Requiring larger <u>allotments</u> sizes to retain productive rural options.
RPROZ-P3 – Reverse Sensitivity	<p>Avoiding <u>reverse sensitivity effects</u> by preventing <u>sensitive activities</u> within close proximity to Quarrying <u>Resource Areas</u>, <u>Strategic Rural Industries</u>, <u>intensive livestock farming</u> or other <u>rural production activities</u> that are lawfully established.</p>
RPROZ-P4 – Unsealed Roads	<p>To reduce the potential of exposure to noise, dust and health risks by requiring a minimum separation for <u>residential units</u> from unsealed <u>roads</u>.</p>

Rural Production Zone (RPROZ)

<p>RPROZ-P5 – Maintain Amenity and Character</p>	<p>To maintain rural amenity, and character by ensuring that all new buildings and major structures and rural land uses:</p> <ol style="list-style-type: none"> 1. Are of a scale and character appropriate to the Rural Production Zone. 2. Are sited in a location sufficiently setback from site boundaries to enable privacy, the retention of openness and access to sunlight. 3. Avoid ribbon development.
<p>RPROZ-P6 – Setback Buffers</p>	<p>To avoid inappropriate subdivision and development in areas required for future urban growth by identifying 'setback buffers' between the Rural Production Zone and the Residential Zones, Future Urban Zone and Rural Lifestyle Zones and the Settlement Zone Residential Sub-Zone.</p>
<p>RPROZ-P7 – Subdivision Greater than 20ha</p>	<p>To enable the subdivision of rural land into allotments of 20ha or more, where the following has been provided for:</p> <ol style="list-style-type: none"> 1. Efficient and effective on-site servicing. 2. Avoidance of erosion, subsidence, slippage, flooding or inundation from any source. 3. Stability of land and its suitability to provide a foundation for the erection of buildings and vehicle access, and parking areas (where provided).
<p>RPROZ-P8 – Subdivision Less than 20ha</p>	<p>To avoid the subdivision of land into allotments less than 20ha unless it is demonstrated that all of the following are achieved:</p> <ol style="list-style-type: none"> 1. It does not create a rural residential or rural lifestyle allotment, other than where a Net Environmental Benefit is achieved. 2. The subdivision of rural land and associated buildings does not inhibit or restrict the productive potential or reasonably anticipated productive potential of rural production activities. 3. The size, shape and arrangement of allotments: <ol style="list-style-type: none"> a. Is a practical size for rural production activities, other than where a Net Environmental Benefit is achieved. b. Does not restrict the range of options for the use of production land. 4. The viability of the existing rural production activity is not compromised and the existing rural production activity can continue to operate efficiently at the subdivided scale. 5. The subdivision and subsequent development will not result in adverse effects on the operation and viability of any adjoining rural production activity or strategic rural industry. 6. The subdivision and subsequent development will not require connection to the District's reticulated sewer or an extension or upgrading of any service or road, except where it is in the economic interest of the District and will not compromise the efficient functioning of the District's infrastructure network.
<p>RPROZ-P9 – Net Environmental Benefit</p>	<p>To protect and enhance biodiversity, landscapes, historic heritage and significant ecology whilst protecting productive rural land resources, rural</p>

Rural Production Zone (RPROZ)

character and amenity by providing for [subdivision](#) where all of the following are achieved:

1. A [Net Environmental Benefit](#) is created by the legal protection in perpetuity and on-going management (maintenance and enhancement of the values and attributes, characteristics and qualities) for one or more of the following:
 - a. Appropriate area(s) of [indigenous vegetation](#), or habitat of indigenous fauna, assessed as significant in accordance with policy 4.4.1 and appendix 5 of the Northland Regional Policy Statement 2016; or
 - b. Appropriate area(s) of Outstanding Natural Landscapes, Outstanding Natural Features, Outstanding Natural Character, High Natural Character; or
 - c. Heritage [Buildings](#) or [Sites](#) of Significance to Māori; or
 - d. Appropriate area(s) of [Highly Erodible Land](#), or [land](#) within a riparian margin of a [stream](#), [river](#), estuary or the coast located within Acutely or Chronically threatened [land environment](#) associated with Land Environments of New Zealand Level 4, will be retired and rehabilitated.
2. The [effects](#) of the number, size and location of [allotments](#), [building platforms](#) and [access](#), are managed by:
 - a. Avoiding:
 - i. Adverse [effects](#) on the areas(s) protected under clause (1) of this policy.
 - ii. Adverse cumulative [effects](#).
 - iii. [Reverse sensitivity](#).
 - iv. Development on [highly versatile soils](#).
 - v. An urban form, by encouraging small clusters of [allotments](#).
 - b. Minimising fragmentation of rural [land](#).
 - c. Protecting the productive potential of the [site](#).
 - d. Retaining natural character, landscape qualities and characteristics, rural character and amenity.
 - e. Determining whether fewer than the maximum number of [allotments](#) should be created.
 - f. Assessing the proposal against the Coastal Environment objectives and policies where the [site](#) is located in the Coastal Environment.

RPROZ-P10 – Other Subdivision

To provide for limited [subdivision](#) of rural [land](#) creating a new [allotment](#) for a surplus existing [residential unit](#) where the balance area of the farm is large and dimensions of the new [allotment](#) can accommodate the existing on-[site](#) services and provide for efficient [access](#).

Rural Production Zone (RPROZ)

RPROZ-P11 – Location and Design of Subdivisions and Associated Land Developments

To locate and design subdivision and associated land development to avoid urban form and character, maintain rural character and amenity values and protect and enhance environmental features by:

1. Designing subdivisions to respond to the topography and characteristics of the land being developed.
2. Avoiding development on highly versatile soils.
3. Identifying building platforms that respond to site topography and environmental characteristics.
4. Locating access ways, services, utilities and building platforms where these can be provided without the need for significant earthworks, retaining, benching or site contouring.
5. Locating access ways, services, utilities and building platforms where the location is sensitive to and responds to environmental features of the site.
6. Ensuring that the subdivision will not create reverse sensitivity effects with respect to existing lawfully established activities.

RPROZ-P12 – Quarrying Resource Area Overburden

Recognise that the placement of overburden from an adjacent Quarrying Resource Area may be appropriate if:

1. It is demonstrated that:
 - a. The placement is necessary for the efficient use and development of that Quarrying Resource Area, including if doing so would preserve the long-term access to regionally significant mineral resources.
 - b. The placement is a final or long term deposition.
 - c. There is no practicable alternative within the Mining Area of the Quarrying Resource Area.
2. Progressive rehabilitation occurs so that rural character and amenity values are maintained.
3. The placement avoids highly versatile soils.
4. The placement is managed to protect existing and consented sensitive activities from unreasonable effects of noise, vibration, dust and illumination.
5. Other adverse effects are first avoided, and if not avoided, are remedied or mitigated.
6. An effective separation distance from existing and consented sensitive activities is maintained to give effect to 4 and 5 above.

Note:

1. *Any placement of overburden outside the Mining Area but inside the Quarrying Resource Area is subject to policy QRA.1.3.3.*

Rural Production Zone (RPROZ)

Rules

RPROZ-R1	Any Activity Not Otherwise Listed in This Chapter	
	<p>Activity Status: Permitted</p> <p>Where:</p> <ol style="list-style-type: none"> Resource consent is not required under any rule of the District Plan. The activity is not prohibited under any rule of the District Plan. 	
RPROZ-R2	Minor Building	
	<p>Activity Status: Permitted</p> <p>Note:</p> <ol style="list-style-type: none"> <u>Minor buildings</u> are exempt from rules RPROZ-R3 – R5. 	
RPROZ-R3	Building and Major Structure Height	
	<p>Activity Status: Permitted</p> <p>Where:</p> <ol style="list-style-type: none"> The maximum <u>building height</u> and <u>major structure height</u> is 10m above <u>ground level</u>. <p>Compliance Standards:</p> <ol style="list-style-type: none"> <u>Mineral Extraction</u> Activities within the <u>Mining Area</u> of a <u>Quarrying Resource Area</u> are exempt and will be assessed by applying the <u>Quarrying Resource Area Chapter</u> provisions. <u>Frost protection fans</u> are exempt from RPROZ-R3 and shall comply with RPROZ-R11. <u>Crop protection structures</u> and <u>artificial crop protection structures</u> are exempt from RPROZ-R3 and shall comply with RPROZ-R12. 	<p>Activity Status when compliance not achieved: Discretionary</p>
RPROZ-R4	Building and Major Structure Setbacks	
	<p>Activity Status: Permitted</p> <p>Where:</p> <ol style="list-style-type: none"> All <u>buildings</u> and <u>major structures</u> are set back at least: 	<p>Activity Status when compliance not achieved: Discretionary</p>

Rural Production Zone (RPROZ)

- a. 8m from all site boundaries.
- b. 27m from Mean High Water Springs and the top of the bank of any river that has a width exceeding 3m (excluding bridges, culverts and fences).

Compliance Standards:

1. Mineral Extraction Activities within the Mining Area of a Quarrying Resource Area are exempt and will be assessed by applying the Quarrying Resource Area Chapter provisions.
2. Frost protection fans are exempt from RPROZ-R4 and shall comply with RPROZ-R11.
3. Crop protection structures and artificial crop protection structures are exempt from RPROZ-R4 and shall comply with RPROZ-R12.

RPROZ-R5	Building and Major Structure Coverage	
	<p>Activity Status: Permitted</p> <p>Where:</p> <ol style="list-style-type: none"> 1. The maximum cumulative <u>building</u> and <u>major structure</u> coverage is 20% of the <u>net site area</u>. 	<p>Activity Status when compliance not achieved: Discretionary</p>
RPROZ-R6	Indigenous Vegetation Clearance	
	<p>Activity Status: Permitted</p> <p>Where:</p> <ol style="list-style-type: none"> 1. The clearance of <u>indigenous vegetation</u>: <p>Either</p> <ol style="list-style-type: none"> a. Does not exceed 500m² per <u>site</u> within each 10 year period from 12 December 2018; except where: <ol style="list-style-type: none"> i. The clearance is directly associated with <u>rural production activities</u> and that clearance is: <ol style="list-style-type: none"> a) Up to 2,000m² in area per <u>site</u> within each 10 year period from 12 December 2018 and the vegetation does not meet the significance criteria in Appendix 5 of the Regional Policy Statement for Northland 2016; or 	<p>Activity Status when compliance not achieved: Discretionary</p>

Rural Production Zone (RPROZ)

	<p>b) Of <u>indigenous vegetation</u> that has grown naturally since 12 December 2018 on <u>land</u> lawfully cleared of <u>indigenous vegetation</u>.</p> <p>AND</p> <p>b. Is not within 20m of a <u>water body</u>.</p> <p>OR</p> <p>c. Is associated with:</p> <p>i. Routine maintenance within 7.5m of the <u>eaves</u> of existing <u>buildings</u>:</p> <p>a) Including the removal of any tree where any part of the trunk is within the 7.5m distance.</p> <p>b) Excluding damage to the roots or removal of any tree where the trunk is outside the 7.5m distance; or</p> <p>ii. Operation, maintenance and repair of existing tracks, lawns, gardens, fences, drains and other lawfully established activities; or</p> <p>iii. Pest plant removal and biosecurity works; or</p> <p>iv. Vegetation removal for customary rights; or</p> <p>v. <u>Conservation</u> planting, including planting for ecological restoration purposes.</p>

Rules

PREC19-R1		
	<p>Activity Status: Controlled</p> <p>Where:</p> <ol style="list-style-type: none"> 1. A single application for resource consent (implementation of which may be staged) to subdivide 128 and 172 Awaroa River Road, Whangarei (Lot 3 DP 317977 and Lot 2 DP 87364) where: <ol style="list-style-type: none"> a. A total of 7 additional <u>allotments</u> are created (excluding 2 balance <u>allotments</u> arising from the 2 existing <u>allotments</u>, each containing an existing <u>residential unit</u>). b. All existing <u>indigenous vegetation</u> within Lot 3 DP 317977 and Lot 2 DP 87364 shall be legally protected in perpetuity in its entirety and managed on an on-going basis in accordance with a Management Plan. c. Every covenanted area is held within a single <u>allotment</u>. d. No new <u>buildings</u> or <u>major structures</u> have been erected since 12 December 2018 prior to <u>subdivision</u> approval. e. Every proposed <u>allotment</u> shall identify a <u>building</u> envelope no larger than 100m² and that complies with the <u>setbacks</u> of the Rural Production Zone. f. Every proposed <u>allotment</u> shall identify the balance of the <u>allotment</u> beyond the identified <u>building</u> envelope as subject to a No Build covenant. g. <u>Buildings</u> and <u>major structures</u> within <u>building</u> envelopes in accordance with PREC19-R1.1(e) shall: <ol style="list-style-type: none"> i. Where the <u>building</u> envelope is located above the 80m contour, not exceed 6m in <u>height</u> above <u>ground level</u>, and otherwise not exceed 8m in <u>height</u> above <u>ground level</u>. ii. Have a roofline below the 90m contour. 	<p>Activity Status when compliance not achieved: Non-Complying</p>

Rural Production Zone (RPROZ)

- iii. Not exceed a combined gross floor area of 750m².
- iv. Not have exteriors:
 - a) Coloured or painted with a colour with a light reflectance value greater than 35%, provided that 2% of each exterior elevation is exempt.
 - b) Utilising mirror glazing.
 - c) With a roof colour with a light reflectance value greater than 30%.
- v. Be built into the landform, stepped in structure, with irregular roofline.
- h. The application shall identify areas of landscape mitigation planting:
 - i. Within every proposed allotment, to filter views of the proposed building envelopes from outside of the subdivision and between building envelopes.
 - ii. For building envelopes above the 70m contour, to ensure that there is a permanent vegetated backdrop so that buildings are not seen on the skyline.
- i. Planting of areas identified in PREC19-R1.1(h) shall be established in accordance with (h) and shall be:
 - i. Legally protected in perpetuity in its entirety.
 - ii. Managed on an on-going basis in accordance with a Management Plan.
- j. All proposed access, driveways and manoeuvring areas shall be finished with recessive materials (i.e. blue metal, concrete with exposed aggregate or black oxide additive)
- k. The application shall include proposed conditions of consent which are a means by which compliance with rules PREC19-R1.1(g), (i) and (j) is ensured.
- l. The application shall include a management plan that specifies the protection measures proposed to ensure

Rural Production Zone (RPROZ)

that the vegetation remains protected in perpetuity, that includes how all of the following matters will be implemented prior to the Council issuing section 224(c) certificate:

- i. The establishment of secure stock exclusion.
- ii. Site preparation and the establishment of plantings.
- iii. The maintenance of plantings. The survival rate must ensure a minimum 90% of the original density and species.
- iv. The maintenance of indigenous vegetation must ensure animal and plant pest control occurs.

Matters of control:

1. The extent of covenant areas and need for on-going management such as pest and weed control, and stock proof fencing.
2. The location and suitability of building envelopes to mitigate effects on privacy, rural character, landscape and amenity values.
3. The adequacy of landscape mitigation planting to mitigate effects on privacy, rural character, landscape and amenity values.
4. The need for additional planting to strengthen any existing native vegetation screening of proposed building envelopes.
5. The use of recessive materials on driveways and maneuvering areas to mitigate landscape effects.
6. The visibility of water tanks, including a preference for vegetative screening.
7. The type and colour of boundary fencing and gates including:
 - a. A preference for post and wire or post and rail.
 - b. A preference for timber rail or steel rail gates.
 - c. A preference for recessive colours.
 - d. Discouragement of solid close board timber fences and gates.

Rural Production Zone (RPROZ)

8. Recessive external lighting.
9. Eco-sourcing of plant species required for landscape planting.
10. Avoiding pest species for landscape planting.
11. Appropriateness of conditions to enforce ongoing compliance.

Note:

1. *Refer to the How the Plan Works Chapter for Assessment of Controlled Activities.*
